

No Longer Supported SimTalk Names of the 2D Visualization

Previous versions of *Plant Simulation* provided *SimTalk attributes*, *SimTalk read-only attributes* and *SimTalk methods* referring to the 2D visualization, which we do not support any more.

The command **Find Outdated Functions** on the tab **Debugger** finds all outdated functions in your model and shows them in a window.

Plant Simulation shows outdated functions in the source code in this color **toLower**.
