

10. Step-by-Step Help

Step-by-Step Help

Introduces the most common modeling tasks. It shows how to proceed when you create your simulation model and how to use the built-in objects to solve your tasks. The detailed instructions help you to quickly learn a procedure.

The **step-by-step help** covers these topics:

- [Getting to Know Plant Simulation](#)
- [Modeling the Material Flow](#)
- [Visualizing the Material Flow](#)
- [Animate the Simulation Model and View the Results](#)
- [Import Data for the Simulation](#)
- [Set Parameters in the Model](#)
